

LAW ENFORCEMENT LEADERS APPLAUD THE MPH-900®

"Law enforcement constantly tells us that LPRs are one of the top kinds of law-enforcement technology that are making huge inroads in their ability to fight crime. They are the best technical advancement for law enforcement since DNA. License-plate readers capture the DNA of the roadway."

—Denise O'Donnell, New York State Deputy Secretary for Public Safety

We are proud to be associated with some of the finest law enforcement agencies in the country. We will continue to support them and their missions by keeping our Mobile Plate Hunter-900® Automatic License Plate Reader at the forefront of law enforcement technology advancements.

"Working with the MPH-900... is like fishing with dynamite... It's tremendous."

—Roger Vanderpool, Arizona Department of Public Safety Director

"Three years ago, all I had in my car was a radio to talk to a dispatcher, and I had to wait my turn. If I was lucky, I could run 10 vehicles a day. Now, with the plate reader and my computer, I've had days when I've read over 8,000."

—David Callister, Arizona DPS Border Crimes Unit Officer

"The potential for this thing is just astronomical."

—Joseph Faughnan, Chief of Police, Clinton, CT

"We're able to scan more vehicles than what the human eye can scan."

—Captain Dan Kaliszak, Baltimore County Police

YOUR MISSION...IS OUR MISSION.

LAW ENFORCEMENT LEADERS APPLAUD THE MPH-900®

"You don't have to be looking for these cars. The cameras will find them for you."

-Chief John Romero, Lawrence Police Department, MA

"It's a useful law enforcement tool because it will return license plates with violations while on routine patrol. It's a good, all-around investigative tool for law enforcement."

-Chief Alan P. Mulkin, Canton, NY Police

"I was blown away by its ability to grab scofflaws. It's well worth its \$21,000 price tag."

-Mayor Timothy Stewart, New Britain, CT

"As a tax collector and somebody who is really enthusiastic about technological advancements, I am thrilled with ELSAG North America's MPH-900. It has made my job much more efficient and even more exciting [to collect over \$2.6 million in back taxes in 18 months]."

-C.J. Cuticello, New Haven, CT Tax Collector (retired)

"From the time that you drive by to the time it picks up the plate, it checks through a database and tells you if there's any wants or warrants associated with the license. It's just an unbelievable tool."

-Sgt. Scott Goodman, Jackson County, MO Sheriff's Department

"They were able to coordinate GPS positions and time, and place that car in front of the house shortly before the alarm was raised with the local fire department. It was a substantial piece of evidence used in the trial [of a 2007 killing of a Fishkill couple and their three children]."

-Pete Kontos, Senior Investigator, New York State Police

"We happened to pass by and alerted on a vehicle license of a sex offender that was in our state that wasn't registered. So that's another thing that the system affords you, and, you know, what is that worth when you're talking about peace of mind?"

-Richland County Sgt. Flynn Tanner
